“How To Automatically Develop Powerful Hypnotic Body Language, Tone Of Voice, Mannerisms, And Gestures Without Having To NLP Anything”

When first being introduced to covert hypnosis and NLP, I found the subject very complicated so I'm going to give you a BIG shortcut.

Just keep reading...

Certainly, there is a lot of technical stuff to NLP and conversational hypnosis ...and if you're anything like me, you probably noticed that the subjects were written by brainiacs who were more interested in sounding impressive more than anything.

...at least that was my impression.

-- PLUS ... everything seemed either too vague or too specific so it was pretty confusing (but mostly overwhelming).

What frustrated me the most however is that later I found out that your FRAME OF MIND can shortcut a lot of the learning curve since it applies to your...

- Body language.
- Tone of Voice.
- Mannerisms.

- Gestures.

In short, *what your subconscious mind believes to be true becomes true in your life!*

I wished I had learned this sooner. It would have saved me sooooo much time and energy trying to "decode" all of that stuff.

So I made an effort to get to the bottom of **how to get your subconscious mind to believe what you want it to** (which turned out to be another not-so-easy task).

That's because most of the "self-improvement" and "law of attraction" stuff out there (even famous works) deal primarily with using the *conscious* mind instead of the *subconscious*.

The problem with using conscious methods to change what your subconscious mind believes is THEY JUST DON'T WORK.

Why?

Because that's not the job of the conscious mind!

The conscious mind's job is to debate, reason, think in analogue models and metaphors.

Most importantly, **it's the job of the conscious to "say NO" to stuff** that isn't in alignment with your innermost desires (not to say yes to what you want).

In fact, if you've tried any sort of positive thinking (focus on what you want) at all then you've probably figured out that it drains you of your energy, you lose your willpower, and change rarely happens.

The truth is, when you WANT something, the secret "code" you are giving your subconscious is YOU DON'T HAVE.

That's why you never seem to get anything you focus on no matter how hard you try.

After all, haven't you noticed that you struggle a LOT to get "new" things or changes in your life and that it's not easy?

-- BUT ... there's good news!

Change or getting what you want is actually SUPER EASY for your subconscious mind.

That's because as soon as it "believes" something -- it comes true for you.

Just think about it: *Everything that is true in your life right now, you believe it is true, right?*

And your conscious mind -- what it sees through your mental filters and thoughts ...are based entirely on what your subconscious currently believes.

That's why knowing what you want is an obvious good start, but your conscious mind (and it's ideas of solutions about how to get it) will only continue to make you run in circles and bring you the same results based on what your subconscious mind currently believes.

That's also why you must (I repeat) **MUST** change your subconscious beliefs to make ANY change you want in your life.

So how do you do it?

Well, it's isn't affirmations, vision boards, sticky notes, mantras, meditation, "tapping" or anything like that.

Again -- those are conscious methods that just don't work because the conscious mind isn't designed for that!

What does work, however, is affirmations being recorded into an audio file in a special way, subliminal recordings, or a special (and newly discovered) instant belief technique -- *that works in 5-minutes or less!*

That means as soon as a new belief is planted into the subconscious, it automatically starts coming true!

I've used it personally to earn millions in sales, capture my dream lover, develop new skills, and be in good health and wellness.

In short, ever since learning how to program positive "is now" beliefs into my subconscious, LIFE GOT A WHOLE LOT EASIER!

Instead of "trying" I didn't have to anymore ...changes just happened and I didn't even have to know how it was going to happen, what I was going to do, who would be involved, or why it even worked and I certainly didn't care when it would.

-- AND ... as soon as I "let go" and just let my subconscious mind solve all those riddles for me, it was like I had found Aladdin's lamp with unlimited wishes that came rushing into my life faster and easier than I could have ever anticipated and it only continues to get better and better.

If this sounds too good to be true, I don't blame you.

I felt the exact same way, until it actually worked for me.

-- HEY! ... I'm not special. So your situation is not unique, and it's certainly NOT hopeless. This is something anyone can do.

The only reason why you haven't done it yet is because very few people are willing to show you how to actually do it right, or they simply just don't know how to do it and instead regurgitate "old school" methods and mainstream techniques or ideas from books and authors that flat out never has, and never will work.

So over the next 3 days, we will go over each of these strategies so you can make "real" changes and improvements without draining your energy, willpower, and getting frustrated with little or no results.

You'll be able to:

Program the subconscious mind to bring you effortless change and improvement -- *in any area of your life.*

You can use it to:
